Titan 9000 lb 2-Post Lift

The Titan 9,000 lb. capacity 2-Posts are commercial grade lifts that are ideal for both automotive service shops and auto enthusiasts. Each lift has symmetrical columns with a telescoping asymmetrical arm design that allows for easy in and out of the vehicle. Equipped with heavy-duty leaf chains, steel pulleys and high-strength cable equalization system these rugged and versatile lifts are engineered and manufactured to the highest quality standards. For safety, the arms are powder coated bright yellow, there is an automatic safety lock system with a dual point safety release and electric override automatic safety shut off (clear floor model). These lifts come in your choice of either the standard clearfloor model or the low profile floorplate model for a lower ceiling clearance.
