Titan Bulldog Moto Cradle

With its dual action EZ-Load rocking and Cam Clamping design cradle, this wheel chock is unique from all others on the market today. Perfect for holding bikes upright, towing purposes, or space saving storage, the Bulldog is extremely secure and simple to use. As your bike rolls into the chock the rocking movement of the cradle allows you to effortlessly load the bike while the cradle simultaneously clamps around the tire to properly and securely hold the bike in place. This heavy-duty, steel-constructed wheel chock has three cradle positions to accommodate most wheel sizes and a safety latch to keep your bike safe and secure when loaded.

Specifications	Bulldog
Wheel Diameters	13" - 22"
Wheel Width	70mm - 140mm
